

Application Development and Integration

About the Client

An US-based medical staffing company with a group of limited liability partnerships, contracts with hospitals nationwide to staff their Urgent care Departments, Clinics and Hospitalist programs. The Company is having partnership with more than 200 facilities and 1500 practitioners.

The screenshot shows a web application interface with a navigation menu at the top (Home, Affiliates, Clients, Billing, Payments, Inquiries, Reports, Dashboard, Recent Rems) and a user profile (M. John | Logout). Below the navigation is a 'Home' button and a 'Team Management' dropdown. A 'Quick Search' bar is present with fields for Invoice #, Site No., and Facility Code. The main content area is divided into two sections: 'Reminders' and 'Paid Due Client List'. The 'Reminders' section contains a table with columns: Type, Description, Date, Invoice #, Facility, Site No., Name, Comment, and User. The 'Paid Due Client List' section contains a table with columns: Facility, Site No., Name, Days, and Amount.

Type	Description	Date	Invoice #	Facility	Site No.	Name	Comment	User

Developed a service oriented architecture to adopt future requirement in no time

Business Needs

- Our Customer is in need of an automated billing system eliminating the manual nature of creating the invoices and statements and facilitate 100% accuracy
- The automated system should accelerate the process, improve collections and reduce Average Days Open, increase automation, and increase transparency to executive management

Technology Stack:

- Microsoft™.Net Framework 4.0
- Entity Framework
- C#.NET
- ASP.Net
- SQL Server 2012 R2
- Telerik RAD Controls

Business Challenges:

- Eliminate manual nature of creating the invoices and statements
- Client was in need a web application for the early go to the market strategy
- Quicker and easier retrieval of information related to Client Invoices
- Maintain detailed time bound affiliates of clients
- Integrate the existing and in house applications with immense security
- Low cost and hassle free maintenance with increased performance

Our Solution:

- Designed and developed an online web application
- Implemented Oakridge-RAD™ framework for quicker development
- Implemented iterative development methodology to reduce the time for go to market and gain the customer confidence
- Proposed and developed a web based solution in managing billing and raising the invoices
- Implemented Single Sign On as integrated application access for internal finance team
- User friendly screens using RAD tool kit controls
- Developed a service oriented architecture to adopt future requirement in no time
- Adopted processes and procedures from Oakridge QControl (Oakridge proprietary quality framework) and sustained the quality

Key Benefits:

- Automated online billing and invoice process had led to accurate billings and on time
- Improved collections with accurate data
- Clear visibility across the board
- Effective management information system
- Reduce ADO by 100%
- Avoided multiple logins across the internal applications
- Implemented a role based security that enable a secured transaction
- Highly scalable design and architecture for adopting the future needs
- Knowledge management was established in every phase and obtained customer commitments

About Oakridge Infotech

Oakridge Infotech has been delivering technology solutions for global clients. We have grown into a mature IT solutions provider delivering innovative technology solutions and services across multiple domains. We provides services and solutions spanning across Microsoft's product line to deliver improvements across the entire enterprise.
