BUSINESS PROCESS MANAGEMENT

Our services span across process discovery, documentation, integration, automation and innovation

EFFECTIVELY MANAGE PROCESSES AND IMPROVE EFFICIENCY

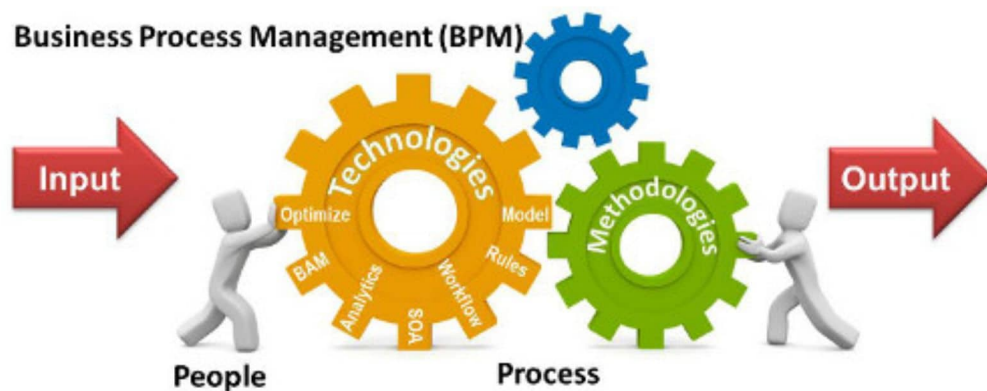

Oakridge follow a unique approach that helps enterprises optimize processes by blending traditional business models with emerging technology practices. Utilizing our Business Process Management services, we have been highly successful in providing effective software solutions to meet our clients' business goals. We help our clients create an IT and management environments that react more quickly to changing business dynamics through one or more automated business processes that involves a cycle of design, modeling, execution, monitoring and optimization. This helps in improving information flow and efficiency of business process.

Agile business processes and integrated applications are vital for the growth of enterprises across industries. Oakridge Infotech's Business Process Management (BPM) and Enterprise Application Integration (EAI) practice conceive solutions to integrate applications and optimize processes. This is accomplished through proven frameworks, technologies and delivery methods. With our expertise-led approach and technology acumen, we deliver end-to-end solutions spanning process discovery, documentation, integration, automation, monitoring and continuous improvement.

Our dedicated Centers of Excellence (CoEs) act as innovation centers and enable us to deliver exhaustive assessments of our clients' business process landscape

With SOA / BPM platforms and tools from Microsoft BizTalk, we are equipped to provide insights into product roadmaps and help plan and execute strategies better.

Our proven industry solutions have helped enterprises from diverse industry segments including manufacturing, travel, logistics, banking, financial services, insurance, media and retail domains to jump start their implementations and resolve business challenges with ease.

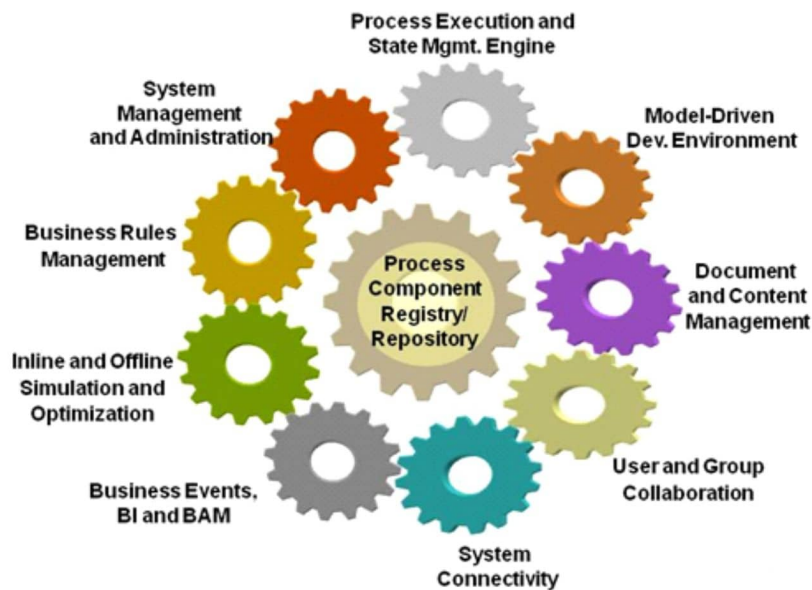

One software, many applications

The Oakridge Infotech's BPM offers such a wide range of application scenarios: transparent modeling of business workflows, implementation of processes that integrate users (customers, partners, and employees), black-box processing that doesn't require any user interaction, electronic data interchange with business partners, and integration of third-party systems into process applications, all the while guaranteeing process quality and availability.

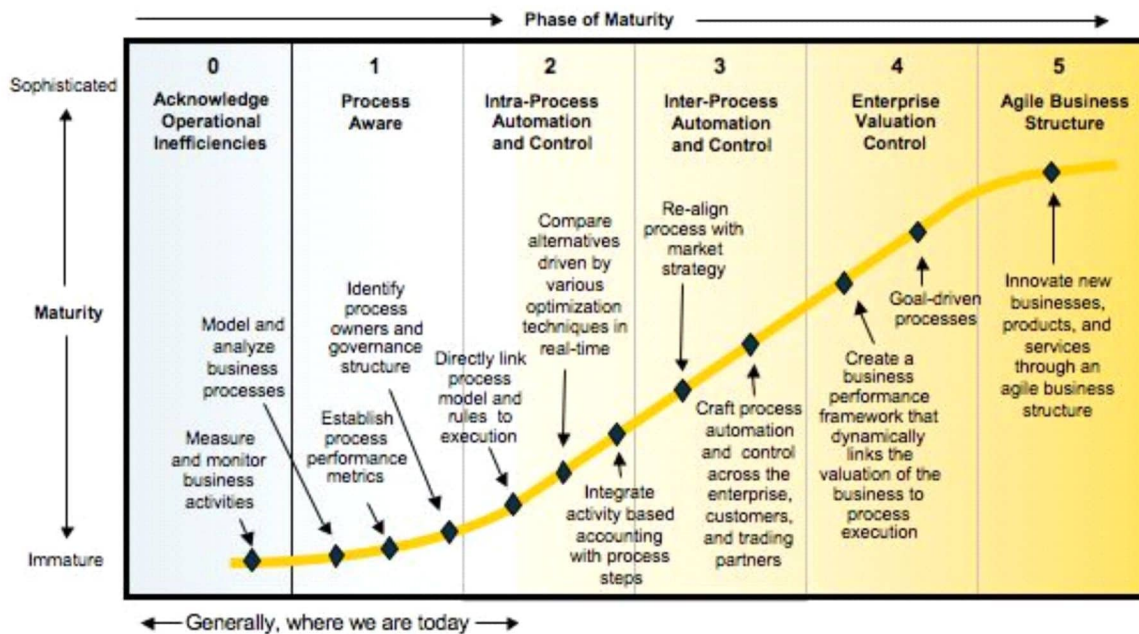

Delivering results for businesses worldwide

International companies of all sizes and from a wide variety of sectors have chosen Oakridge Infotech's BPM to make their processes more flexible and automate their workflows. They have been won over by our product's technology as well as our numerous service and support offers. That's how we cultivate long-term cooperation with our users in partnership-based relationships that benefit both sides.

IMPLEMENTATION AND EXECUTION

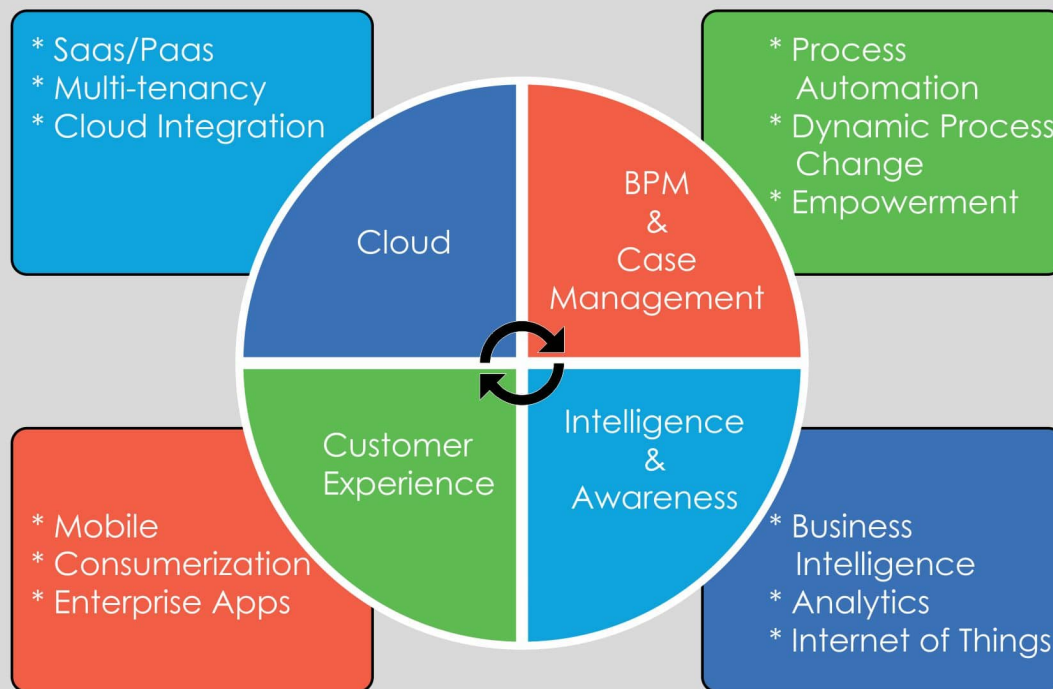

Oakridge Infotech BPM enables you to implement modeled business processes quickly and easily. The graphical configuration of executable workflows and their generation from business oriented models lead to a noticeable boost in efficiency. In Oakridge Infotech BPM you can navigate from a high-level business process to a detailed process and on to an executable process without media disruption.

BPM as super-glue for Social, Mobile, Analytics and Cloud (SMAC)

Whether it's connecting employees within the enterprise, or clients to businesses, or reaching out to partners to develop innovative products or services, BPM acts as the glue that binds and connects. It provides a flexible framework to connect people with information in an open manner, ensuring visibility, performance and compliance to regulatory requirements.

We help enterprises explore the synergies between SMAC technologies and BPM, which in turn supports them to take informed decisions and build intelligent business processes. By incorporating functionalities that support real-time business analytics, deep complex-event processing, social media to support behavior and collaboration, and expanded technologies to support growing requirements for mobility, BPM can be extended to the next level of adding more intelligence to processing capabilities.

AGILE BPM PROCESS APPROACH

Our agile BPM delivery processes, templates and frameworks coupled with in-depth engineering capabilities enable our clients to realize benefits within 90 days. Our incremental value driven approach de-risks challenges associated with BPM implementations and provides immediate benefits, while ensuring that long terms goals are met within stipulated budgets. The factors that help us deliver value:

- ➡ Service Oriented Architecture (SOA) and BPM
- ➡ Products-specific estimation and requirements tools
- ➡ Single team for all process, rules, analytics and integration needs
- ➡ Minimum rework and reduced project overhead for maximum value

Transformational	Operational	Technical
Building the BPM business case and vision Project management Knowledge of organizational structure and culture Communication Organizational change techniques	Business process discovery Business process modeling, analysis and design Business process governance and process policy management Process performance management Constructing a BPM methodology toolbox	Solution architecture and design BPM technology product knowledge Agile and model-driven application development Business process optimization and simulation User experience design

ABOUT OAKRIDGE INFOTECH

Oakridge Infotech has been delivering technology solutions for global clients. We have grown into a mature IT solutions provider delivering innovative technology solutions and services across multiple domains. We provides services and solutions spanning across Microsoft's product line to deliver improvements across the entire enterprise. We engage with customers to help unify their web assets; including Content management, collaboration platforms, analytics, cloud solutions, enterprise mobility, CRM, ERP, social marketing, rich media applications, search, digital marketing integration, and many more.
