IT APPLICATION SERVICE

We help your application landscapes productive and adaptable for your enterprise.

DELIVERING HIGHLY SCALABLE, ROBUST AND SECURED APPLICATIONS

Over the years Oakridge has created a niche in the domain of application development services. It has been able to provide its clients with innovatively customized solutions for their individual IT requirements. Our expert solutions are driven by our ability to combine pioneering as well as nascent technologies from a broad range of industries. Applications Development and Integration services with Oakridge holistic Catalyst methodology and Project Management Institute's proven techniques ensure repeatable project results.

BUILD, OPERATE AND TRANSFORM YOUR NEXT GENERATION APPLICATIONS

Application Development

We leverage mature application development processes, tools, and methodologies, as well as comprehensive verification and validation procedures to ensure delivery of high-quality applications that are engineered to drive business agility.

Application Management

Our proven outcome based managed services application management models ensure effective application maintenance and support based on defined SLA's. Our onsite offshore LEAN based application management models give significant cost benefits. In addition to delivering reliable support and maintenance services, we also undertake key initiatives to continually improve the service quality based on our 'New Ideas More Value' continuous improvement framework.

Business Intelligence

We help build and maintain data warehousing solutions that fulfill their reporting and querying needs and meet their business objectives. Built on leading-edge products, our solutions ensure that business users are armed with the right information to respond swiftly to dynamic customer needs and changing business requirements.

Application Integration

We deliver better returns on investment, improve organizational productivity, and speed up responsiveness to change by helping you realize the full potential of your enterprise application portfolio through our application integration services.

Application Portfolio Rationalization

By evaluating varied functional and technical dimensions, we identify each application's position in its lifecycle, assess the opportunity for improvement, calculate potential impact, and guide the actions needed to optimize the application's business effectiveness.

Legacy Modernization

Legacy systems typically define and control many critical business processes in large organizations. We have built capabilities in re-engineering legacy applications using Workbench tools for business rule extraction from legacy code and moving into forward engineering using well-defined processes.

Application Testing

Our testing services help significantly reduce or eliminate issues related to functionality, performance, quality, and reliability. We provide systematic software quality assurance services as well as domain-specific testing frameworks.

GET MORE VALUE

Consistent Knowledge Management

We develop a unique knowledge management platform for each engagement, which plays an important role in transitioning knowledge from your IT team to the Oakridge Infotech team. During the steady state, the Knowledge Management tool serves as a centralized repository of project documents to provide the right information to the right people at the right time. This also reduces the risk of person dependency and safeguards project knowledge.

Global Delivery Model

Our proven global delivery model is shaped by CMMi Level 5 mature processes and methodologies. We leverage a mix of onsite, offshore, and near-shore resources to optimize costs and ensure 24x7 service availability.

Code Comprehension Framework

This in-house developed, code comprehension and migration framework with support for commonly used legacy languages is a major accelerator for legacy modernization and application management engagements on legacy platforms.

BUSINESS BENEFITS

We facilitate alignment of IT objectives with your strategic business goals and create a new operating normal characterized by a lean, integrated, and future-ready application environment. Partner with us to experience:

More Savings Decreased cost of maintaining applications infrastructure and long-term cost benefits through a global delivery support model and optimized utilization of IT staff.

Niche Expertise

We bring best practices to every engagement from our technology-focused Centers of Competence and reduce time-to-value through our domain-specific testing frameworks

More Efficiency Increased operational efficiency by modernizing legacy applications and ensuring high availability of existing applications.

More Agility Greater responsiveness to business needs, enabled by enhanced application functionality, a more flexible technology environment, and faster time-to-market for new releases.

WE BRIDGE THE GAP BETWEEN APPLICATION AND BUSINESS PERFORMANCE

We bridge the gap between Application Performance and Business Performance Challenges inspire us. Complex problems motivate us. Crunching timelines bring out the best in us. That's why our clients, global market leaders across sectors, share deep and long-term relationships with Oakridge Infotech as their preferred application services provider.

Through our 'focus and differentiate' strategy, we partner with clients in select industry verticals – travel and transportation, banking and financial services, insurance, media, manufacturing, retail and distribution. This focus has helped us understand the complexities of industry-specific application environments. Over multiple engagements, we have shaped best practices and strategies on how to effectively reshape these environments by minimizing disruption and increasing business agility.

We have forged strong partnerships with technology providers to bring our clients cutting-edge solutions as well as an ecosystem of specialized services and thought leadership that enables new operating models and sharpens their competitive advantage. This also equips us with the agility and flexibility required to quickly meet specific client requirements.

Coupled with our belief in continuous service improvement is our focus on understanding the client needs thoroughly in order to provide tailor-made solutions. This has helped us build capabilities that enable our clients to successfully deliver on their most pressing business mandates—from launching new products to entering new markets.
