

Verification and validation take up to 40% of effort and resources in software development. Fighting time-to-market and cost constraints, enterprises often risk production quality with inadequate testing, resulting in higher maintenance costs, increased chances of failure, and customer dissatisfaction. We work with organizations across the globe to meet their testing requirements. By leveraging our domain, frameworks, tools, and methodologies, we enable enterprises to reduce time and effort spent on testing, thus making the entire software development life-cycle more efficient and achieve the desired business outcome.

Since software quality is vital, the testing process followed during software development is crucial. Organizations are often constrained by the availability of test data and create test case scenarios manually. This approach not only delays the testing process, but also affects the quality of testing and poses the risk of incomprehensive testing. Non-availability of the test environment and other system components further prolongs the testing process. In addition, from the compliance perspective, test data needs to conform to legal and regulatory requirements, to avoid legal risks and potential damages caused by unauthorized data access.

To address these challenges, organizations need to transform their testing processes with the objective of accelerating delivery, improving quality and reducing the cost of quality. Oakridge Infotech introduces Independent Verification and Validation Services as an integrated end-to-end testing solution that brings automation early in the software testing lifecycle (STLC) and helps business outpace competition through improvement in time to market, enhanced quality and reduced costs. Oakridge Infotech automates the process of application testing by auto-generating test cases, reducing dependency on the availability of various components for testing, and providing test data and environment management services.

Overview

In a fast-moving and often unpredictable world, you need abilities and instincts that match up. You need to be able to identify market needs, create new products or services and enhance existing ones, and then make your move before the competition does.

In addition, enterprises are coping with the explosion of disruptive business events like new technology paradigms, new growth markets, mergers and acquisitions, distributed systems, multiple IT touch points that increase the need for high availability and reliability of systems, complex, seamless and distributed IT architecture, and a demanding and everchanging regulatory landscape. These factors drive enterprises to continuously strive to stay competitive in the new business scenario. Testing is one of the strategic levers that helps achieve these business imperatives.

Your development cycle must be fast but thorough and it cannot get bogged down in bureaucracy or antiquated processes. As IT and business processes become integrated and tightly linked, organizations have

Domain Knowledge

Oakridge Infotech has a rich domain knowledge spanning across all major industry verticals. By its decade long expertise in independent testing services coupled with multiple marquee clientele experience, Oakridge Infotech has achieved deep domain advantage and created a massive library of domain-based, reusable business functions. This gives you the necessary edge and transforms your business by reducing time to market for new products by 15-20%. Oakridge Infotech also provides you a verticalized resourcing structure with the right blend of domain, technology, and testing.

Delivery Assurance

All testing solutions are personalized to your requirements, and assured delivery is realized through proven engagement model, twin pillars of product and process quality, instances of QA guardian, test value chain digitization and synergistic independence in testing services.

the importance of testing, but are often faced with the challenges of performing this task effectively.

Oakridge Infotech Verification and Validation Assurance Services is built to provide you with the non-disruptive, agile, digitized, standardized and transformative solutions that you need to turn your ideas into revenuegenerating products and services. Our spectrum of services help you do just that for less money, in less time, and in a simpler manner. Your strategy is to thrive in an uncertain world and our expertise and experience can help you do that.

Innovation

Oakridge Infotech has set up state-of- the-art Labs for test automation and performance engineering to develop and deploy best in breed testing assets and accelerators to customers. Oakridge Infotech has also partnered with top notch universities and coinnovation partners with primary focus on testing and QA. Oakridge Infotech innovative and flexible pricing option trusts cost leadership to customers.

The Oakridge Infotech Advantage

Our Verification and Validation services offers a compelling proposition served on a global stage with multiple facilities to choose from. You can benefit from three unique Oakridge Infotech advantages - domain heritage, innovation, and delivery assurance - for excelling in your QA services.

The Oakridge Infotech Advantage

Oakridge Infotech Verification and Validation Services offers a wide spectrum of services in both the "Plan" and "Execute" phases of testing. The "Plan" phase entails consulting services and "Execute" phases offers the implementation and solutions aspect of testing services. Our comprehensive pack of testing solutions helps you improve time-to-market for new product releases, increase cost savings, and achieve outstanding quality through better processes, tools, and techniques.

Our consulting offerings help in strategy definition as we work with customers to derive strategy based on risk analysis, feature prioritization, and automation opportunities as well as with test refinement, wherein we assess and improve testing processes using industry standard models. In our Execution services, we work in a variety of engagement models with our customers to help in functional testing, system testing, regression testing, and user acceptance testing. Our nonfunctional testing services are based on the principle that performance must be engineered into a solution rather than tested and include performance testing tuning and optimization, and benchmark tests.

ABOUT OAKRIDGE INFOTECH

Oakridge Infotech has been delivering technology solutions for global clients. We have grown into a mature IT solutions provider delivering innovative technology solutions and services across multiple domains. We provides services and solutions spanning across Microsoft's product line to deliver improvements across the entire enterprise. We engage with customers to help unify their web assets; including Content management, collaboration platforms, analytics, cloud solutions, enterprise mobility, CRM, ERP, social marketing, rich media applications, search, digital marketing integration, and many more. We make sure the customer expectations with user experiences, increased business agility, enriched quality and on time deliverables with tools and processes.
